## Introduction

Enlabeler is the leading artificial intelligence, data driven platform that allows data scientists to align their data sets and train their ml-models.

This user manual will show how new users can create new projects on the Enlabeler e-commerce site to track their performance.

## Accounts

### Creating a new account

Users will start on the home page:

To create a new account, users will have to click on login, at the top right of the navigation bar.

After this, they will be redirected to the login page. From here, users can click on the registration “call to action”. User will just need to fill in all the requested info and click on submit.

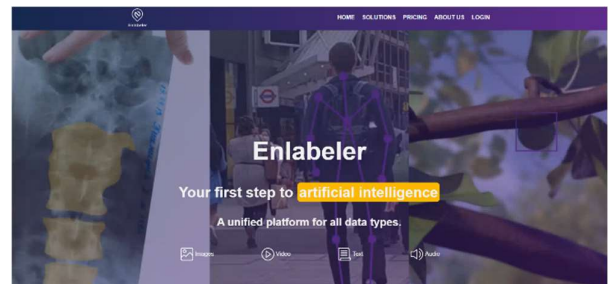

Figure 1: Home Page

Once the user has done this, an email with confirmation will be sent. Various other emails can be sent as well. These include, but not limited to, requesting to reset their password.

Figure 2: Registration Page

### Login to existing account

For users with existing account, they can simply just login by filling in their profile details.

Figure 3: Login Page

## Resetting password

To reset a user’s account password, the user just needs to click on the reset password “call to action”. From here the user needs to fill in the relevant information.

Figure 4: Reset Password Page

Figure 5: Reset Password Page two

The user will receive an email with a link to reset their password. Once they follow the link, the user would just need to fill in the form. After they are done, they will receive an email.

## Projects

### Creating a new project

Logging a new project is as easy as creating an account. Users can either click on the card or click on the new project link in the navigation bar.

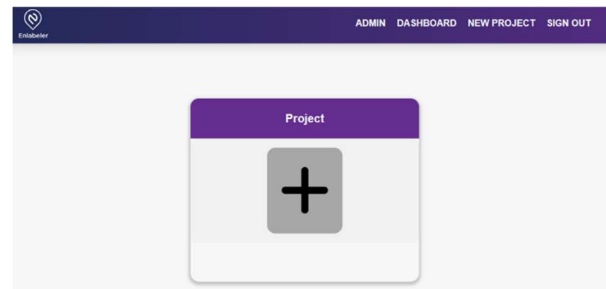

Figure 6: Dashboard Page

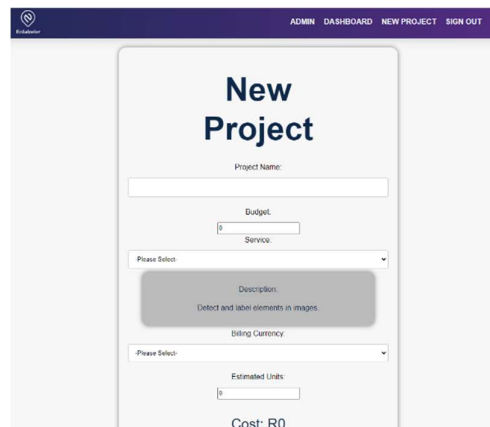

The 'New Project' form includes the following fields: 'Project Name' (text input), 'Budget' (text input with a dollar sign), 'Service' (dropdown menu), 'Please Select' (dropdown menu), 'Description' (text area with placeholder 'Detect and label elements in images'), 'Billing Currency' (dropdown menu), 'Please Select' (dropdown menu), 'Estimated Units' (text input with a dollar sign), and 'Cost: R0' (text input).

Figure 7: New Project Page

The user can fill in the required info on the form. This form will also provide feedback to the user based on their input, for instance the cost of their project.

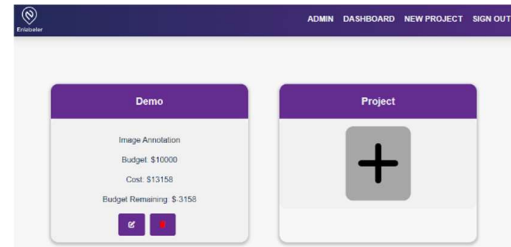

Figure 8: Dashboard Page after new project

### Edit an existing project

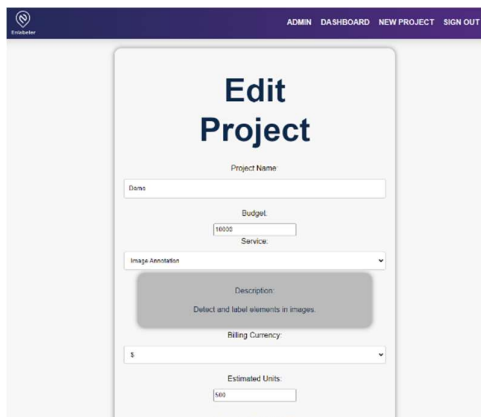

The 'Edit Project' form includes the following fields: 'Project Name' (text input), 'Date' (text input), 'Budget' (text input with a dollar sign), 'Service' (dropdown menu), 'Image Annotation' (dropdown menu), 'Description' (text area with placeholder 'Detect and label elements in images'), 'Billing Currency' (dropdown menu), 'Please Select' (dropdown menu), 'Estimated Units' (text input with a dollar sign), and 'Cost: R0' (text input).

Figure 9: Edit Project Page

To edit the project, it is as simple as clicking on the edit button on the project card. This will take the user to the project details. Here the user can change any info they want on the project.

## Deleting a project

To delete a project, the user just needs to click on the delete button.
